Electric tailgate of Hyundai Tucson L

Brand: cartailor

Introduction

Electric tailgate for Hyundai Tucson L with 1 tailgate.

Electric tailgate is a convenient and practical upgrade for your car. It allows you to open and close the trunk door with a button on the remote control. It is an excellent solution for those who have their hands full of groceries or luggage, children or pets.

Our electric tailgate kit for Hyundai Tucson L is designed to be easily installed by a car enthusiast (see installation instructions below). The kit includes all necessary components and cables, and does not require any modifications to the car's factory wiring harness. The installation process is reversible, so you can return your car to its original state if you decide to sell it or change it back to a manual tailgate.

Our electric tailgate kit for Hyundai Tucson L is a reliable and durable solution that will last for many years. It is made of high-quality components and tested for compatibility with various car models and years, and offers stable control, comfortable lifting, and safe operation. The kit includes a remote control with a convenient and ergonomic design, which allows you to open and close the trunk door from a distance of up to 10 meters. The remote control also has a button to stop the movement at any position, which is convenient if you need to stop the tailgate at a certain height.

We also provide a wide range of additional options for our electric tailgate kit, such as a soft close function, which prevents the tailgate from slamming shut, and a memory function, which allows you to save the desired height of the tailgate and automatically open it to that height next time.

Kit Type: Factory Harness

1. Remove the factory tailgate handles for tailgate
2. Remove control keys using gloves the tailgate handle
3. Install control switch. Press and hold for 7 seconds
4. Tailgate switch. Press briefly
